goodwill columbus

Information technology credentials

We offer several free certification courses so you can find your first or next best job in the growing field of IT.

Our information technology programs and pathways

Google IT Professional Career Certificates

The Google IT Professional Career Certificates encompass a range of programs including IT support, data analytics, project management, cybersecurity, ecommerce and digital marketing, IT automation with Python, and user experience (UX) design. These courses are designed to equip learners with the practical skills and knowledge they need to pursue a career in these respective fields.

Network +

This respected certification demonstrates expertise in networking fundamentals, essential for those seeking a career in network administration and IT infrastructure.

CompTIA A+

CompTIA A+ is a globally recognized certification that validates foundational IT skills and knowledge, making it an essential credential for those pursuing a career in information technology.

Security +

This highly regarded certification confirms proficiency in cybersecurity principles, a vital credential for individuals aiming to safeguard information and systems against evolving threats.
